Subject: multi-year agenda next steps
Attachments: draft MYA 12-09-15_NCEA.pdf

So, hearing that there haven't been any roadblocks thrown up. We have a couple tasks for the multi-year agenda today. I'm quickly looking for people's opinions.

- 1) We have to let our Agency partners know, and that we intend to go public on the 15th. That could probably be done by sharing the version of the MYA attached to this email, which is just a PDF of the version provided to OMB today (still has the draft watermark). Norm, could you take care of this?
- 2) We have to provide a copy of the multiyear agenda to OCIR today, for notification to Congress on Monday. I propose to just share the 12/9 draft above, after removing the draft watermark. Any concerns?
- 3) We have to consider when would be best to start getting the draft made 508 compliant for posting on Tuesday. Since it sounds like no one was pressing a hard stop at the OMB briefing, do people think it's ok to go ahead and send the 12/9 draft (minus the watermark) to Maureen as "final" for getting made 508c? This assumes 1) no significant edits from OMB, and 2) that we aren't inserting language into the MYA to address diesel. Any concerns?

We have the web text for vanadium that Lynn has circulated and notified Maureen about on the website. We also have web text for the rest of the website under review to address adding the MYA. We should get that to Maureen this afternoon.

-Lou
